EyeOnAccess Academy

Managing Access to Anti-VEGF Therapies for Retina Clinics

Regeneron is proud to provide this program to support our retina specialists and clinic staff.

Click here to view available resources or scroll down to learn more.

Designed for busy clinicians and staff, our suite of intuitive, self-study micromodules covers:

Drug acquisition and billing processes

Insurance benefit design and reimbursement dynamics

Drug supply chain

Payer utilization management

Operational considerations for access to anti-VEGF therapies

Program objectives:

Enhance knowledge of retina business and treatment models to help improve treatment options for anti-VEGF therapies

Provide education to inform on potential patient access barriers in the treatment for retinal disease

Deliver critical insights to help navigate impact of market changes on patient care

Managing Access to Anti-VEGF Therapies: An Educational Series for Retina Clinics

Introduction to Managing Access to Anti-VEGF Therapies: An Educational Series for Retina Clinics

This module introduces the program and provides basic information on how to select modules and navigate the material.

Download

After reviewing the introductory module, select modules below based on your interest or educational need.

Please click below to view and download each on-demand interactive module.

Anti-VEGFs and the Retina Clinic Treatment Model Modules 1-3

**Overview of Treatments and Reimbursement Considerations Within the Anti-VEGF Landscape**

This module provides an overview of important concepts to the anti-VEGF landscape, including:

- Evolution of available anti-VEGF treatments
- Insurance provider strategies
- Insurance provider contract impact on retina clinic

Download

**Drug Acquisition in the Clinic**

This module reviews models for and implications of anti-VEGF drug acquisition, including:

- Overview of insurance types, specialty pharmacy, and medical benefit
- Highlights of the buy-and-bill model
- Impact of buy-and-bill on clinic revenue cycle management

Download

**Considerations for the Use of Anti-VEGF Agents in the Retina Clinic**

This module highlights information related to the use of anti-VEGF therapies, including:

- Involvement of various stakeholders
- Clinical and reimbursement considerations impacting therapy selection
- Important considerations for retina clinic decision makers

Download

Understanding and Managing Patient Access to Therapy Modules 4 & 5

**Managing Patient Access to Therapy**

This module highlights information on patient access to anti-VEGF therapies, including:

- Overview of the pharmacy benefit, pharmacy benefit manager role, utilization management, and drug rebates
- Overview of the medical benefit and the buy-and-bill drug acquisition model
- Advantages and disadvantages of the buy-and-bill model for retina specialists managing patient access to anti-VEGF therapy

Download

**Benefit Design and Medical Policy Impact on Access for Patients**

This module establishes foundational knowledge about patient insurance benefit design and its relevance for access to anti-VEGF therapy, including:

- Steps required to secure efficient access and reimbursement
- Regeneron's commitment to the retina community

Download

Regeneron encourages you to review these modules at your convenience and reach out if you would like to discuss them further. We welcome your feedback and input on information that supports your clinic in managing patient care.
